#### Report on the Career Counseling- Protocol for Paradigm shift from textbook

to scientificresearch: A discussion

Counseling on future prospects for students of biological sciences organized by Dept. of Microbiology and IQAC, in collaboration with Microbiologists Society of India, West Bengal chapter

**Objective:** Transitioning from a reliance on textbooks to engaging in scientific research represents a significant paradigm shift in education. It's a journey from passive consumption of information to active exploration and discovery. Educators, students, and policymakers need to grasp the limitations of traditional textbook-based learning. This fosters connections between undergraduates and the broader scientific community through partnerships, guest lectures, and field trips to research facilities and encourages students to present their research findings at conferences, science fairs, or community events to build confidence and communication skills.

Microbiologists Society of India is a non-profit registered national organization initiated for the spread of interest in microbiology and its growing importance in the global scenario in multiple facets of the human society. The primary objective of the event was to refresh the conception of students regarding research life and enlighten themselves while taking this huge leap from textbook knowledge to innovation and research philosophy.

#### **Speakers:**

#### 1. Dr. Prachetash Ghosh

Postdoctoral Fellow Dept. of Medical Biochemistry & Biophysics Umea University, Umea, Sweden

#### 2. Dr. Sambit Roy

Research Associate Michigan State University, East Lansing, MI, USA

Number of participants: 91 students from different colleges across West Bengal.

Date: 21st September, 2021.

Platform: Zoom and You tube streaming

**Outcome:** The students were made aware about the mechanisms by which textbook knowledge can be applied in practical field, i.e. the textbook-research article interface was discussed in details. Also the various opportunities after graduation at different countries were discussed. Students interacted with the two esteemed speakers freely and gathered noteworthy insights which can pave their movement in future.
